

## About NOWOFOL®

NOWOFOL Kunststoffprodukte GmbH & CO. KG in Siegsdorf (District Traunstein/Bavaria) is the world largest manufacturer of high-strength, longitudinal (monoaxially) oriented and non-oriented flat film out of Polypropylene, Polyethylene and other thermoplastics.

At present the annual production amounts approximately 15,000 tons. The broad variety of applications covers packaging, technical tapes, tear tapes, carrying handles, release liners and lamination films, as well as special films for different industries. From roofing membranes over die cutting applications, loudspeakers, sports articles, film labels, banding systems, decorative ribbons, up to specialities like transfer printing labels or flexible pipes. The products are supplied to numerous customers, like packaging manufacturers and film converters over the transportation industry, the cable industry and CD manufacturers up to airplane producers.

NOWOFOL, founded 1971 from the companies Brückner and Nordwolle, is today owned by 23 private partners. From the turnover, which is in a magnitude of 35 - 40 million € per year, about 75 per cent go into the export. The films are supplied to 63 countries, from Finland to South Africa and the USA to Australia. Approx 120 co-workers are employed.
